DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1 and 12 have been considered but are moot in view of the new ground(s) of rejection.
2. The indicated allowability of claims 1 is withdrawn in view of the newly discovered reference(s) to a mounting template for providing a substantially fixed hollow volume. Rejections based on the newly cited reference(s) follow.

Claim Objections

3. Claim 13 is objected to because of the following informalities: applicant recites "wherein the plurality of diode electrical leads and stiff electrical leads". Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Arnold (4,893,223).
6. "A lighting system for a state theatrical and architectural lighting" has not been given patentable weight because the recitation occurs in the preamble. A preamble is

Art Unit: 2875

generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

7. Arnold discloses a frame means(38) for means for supporting a plurality of light emitting diodes(32, col. 4 lines 15-34) , said frame means including a substantially rigid mounting template for providing a substantially fixed hollow volume means(34) for mounting each diode of said plurality of diodes with said hollow volume of said frame means and simultaneously for positioning said plurality of diodes (col.3 lines 32-46, lines 53-57)) wherein each discrete diode is individually oriented to emit a light beam directly directed to a predetermined illumination area(24) , and circuit board means structurally associated with said frame means for transmitting and controlling electrical voltage to said plurality of light emitting diodes(col. 3 lines 47-51).

8. Arnold discloses the circuit board means is a unitary rigid circuit board and frame including a plurality of diode electrical connectors, and said means for mounting includes said plurality of diodes having a plurality of diode electrical leads (inherent) connected to said plurality of diode electrical connectors, and said means for mounting includes said plurality of electrical leads being individually positioned and angles (mounting (36) provides for the leads and lights being positioned at angles with respect to a vertical position) wherein said plurality of diodes are positioned and arranged

Art Unit: 2875

wherein each said discrete diode light is independently directed to said focal point ((fig 3).

Allowable Subject Matter

9. Claims 2-11, 59-122 are allowed.

10. Claims 13-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter: The reasons for the indication of allowable subject matter are found in the previous office actions.
